**DETROIT, Tuesday, July 27, 2021** – [DT Midstream, Inc.](#) (NYSE: DTM), a premier natural gas pipeline, storage and gathering provider, today announced its new corporate headquarters will open in Bedrock's Ally Detroit Center near Campus Martius, keeping almost 80 jobs in downtown Detroit.

Planned to open Nov. 1, 2021, DTM will occupy 26,000 square feet on the 29<sup>th</sup> floor of the Ally Detroit Center. A contemporary office setting will feature attractive and inviting traditional office space and assigned workspace for up to 84 people, coupled with modern collaboration areas to meet the needs of today's dynamic and growing diverse workforce. DT Midstream, which employs nearly 300 people nationwide, completed its spinoff from DTE Energy on July 1, 2021.

"With the move of our headquarters into the Ally Detroit Center, we have an opportunity to showcase the city among many important customers from highly respected companies across the U.S. and Canada and meet our goal to attract and retain talent," said David Slater, president and CEO of DT Midstream. "Detroit is a global leader in technology and innovation with a diverse, talented workforce who are part of a team that will drive DTM toward our goals of sustained growth within the natural gas industry while also making a positive impact on the environment."

DTM's Detroit headquarters, home to the company's executive leadership team, will oversee assets in Pennsylvania, West Virginia, Ohio, New York, Louisiana and Texas.

"We are so excited to welcome DT Midstream into our growing portfolio of companies committed to sustainability in Downtown Detroit," said Naumann Idrees, Bedrock's Senior Vice President of Leasing. "The company's forward-thinking strategy will not only set them up for success for years to come but provide continued momentum to the wave of industrial technology launching in Detroit."

DT Midstream is an owner, operator and developer of natural gas pipelines, storage fields, gathering systems as well as compression, treatment and processing facilities. The company transports clean, natural gas for utilities, power plants, marketers, large industrial customers and energy producers across the Southern, Northeastern and Midwestern United States and Canada.

The company has a portfolio of integrated assets strategically located in the premier Marcellus, Utica and Haynesville dry gas basins serving key growing markets; a strong balance sheet with low leverage; and predictable and robust contracted cash flows.

DTM is committed to delivering reliable, clean energy and continuing its [heritage of corporate giving and volunteerism](#) by putting its energy into making a positive difference in the places where its team members live, work and operate.

DTM leads the industry as one of the first midstream companies that has committed to achieving zero greenhouse gas emissions by 2050. The company expects to achieve a 30% greenhouse gas reduction in the next decade. Methane intensity from DTM's gathering operations was materially below that of industry peers in 2019.
